### Description

A behavioral intervention plan is a plan that is based on the results of a functional behavioral assessment (FBA) and, at a minimum, includes a description of the problem behavior, global and specific hypotheses as to why the problem behavior occurs and intervention strategies that include positive behavioral supports (nysed.gov, 2015). This session will provide insight into the functional behavioral assessment (FBA) collaborative problem solving process used to describe the purpose of a student's behavior. Participants will also identify strategies and resources for creating and implementing effective FBA and behavioral support plans (BIP).
