Description

So you have completed your Functional Behavior Assessment (FBA). Is the student's needs being met? Are new skills being learned to help the student access and make progress in the general curriculum. A behavior plan that is data based, includes evidenced based practices and is implemented with fidelity helps students learn problem-solving skills and better ways to respond in challenging situations. This session will allow participants to analyze a current behavior plan to determine effectiveness. Strategies, resources and networking opportunities will be provided. **Required: Please bring (or have access to) a student's FBA and BIP.**
